Fitted detector scores
CodeBERT | CodeT5 encoder | Frozen CodeBERT | Hashing-SGD
Same target roster and detector outputs within each comparison
DiverseVul: 38 groups
MegaVul: 6 groups
Collections analyzed separately
1 Workload
Fix total automation
Match confidence selection
Selection + label allocation
2 Allocation
Fix both automatic label counts
Match probability tails
Selection within label counts
3 Operations
Choose review volume
Impose capacity and delay
Cost, backlog and feedback
Class errors | Unresolved workload | Cost per function
Paired project comparisons connect the decision changes to their consequences
